About me

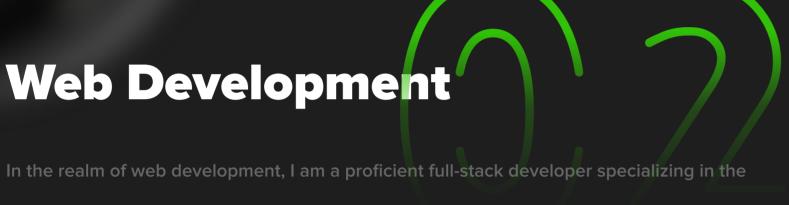

I am a passionate and versatile professional with expertise in graphic design, web development, and system administration. With a solid background in the MERN stack, I am a full-stack developer capable of handling end-to-end web development projects. My skills extend beyond coding as I am also proficient in Linux administration, ensuring smooth operations and troubleshooting in using Python scripts and excel as a web scraping engineer. My talents also lie in cloud technologies, specifically OpenStack, where I excel at managing and troubleshooting virtual machines.

Skills

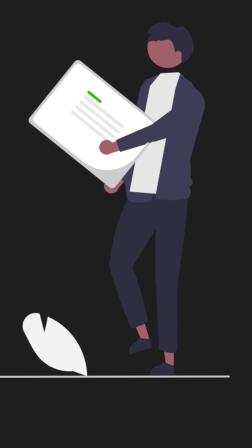

Graphic Design

In the realm of web development, I am a proficient full-stack developer specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js). From conceptualization to deployment, I handle the entire development process, ensuring seamless functionality and an intuitive user experience. I have a strong command of front-end technologies such as HTML, CSS, and JavaScript, which allows me to create responsive, mobile-friendly websites that adapt to various devices and screen sizes.

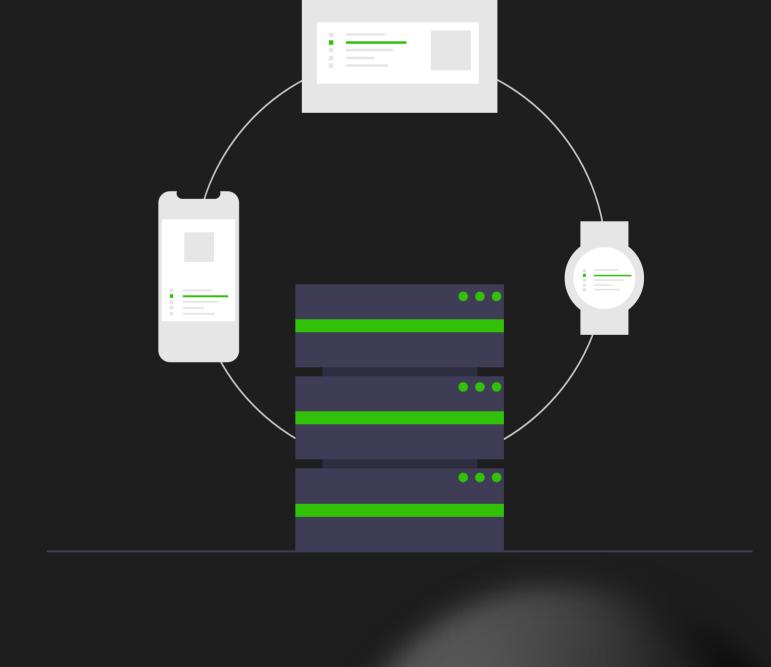

System Administration With a solid foundation in system administration, particularly in Linux environments,

I possess the skills to effectively manage and troubleshoot various systems. From server configuration to performance optimization, I ensure the smooth operation of IT infrastructure. Additionally, I am well-versed in scripting using Python, enabling me to automate repetitive tasks, streamline processes, and boost overall productivity.

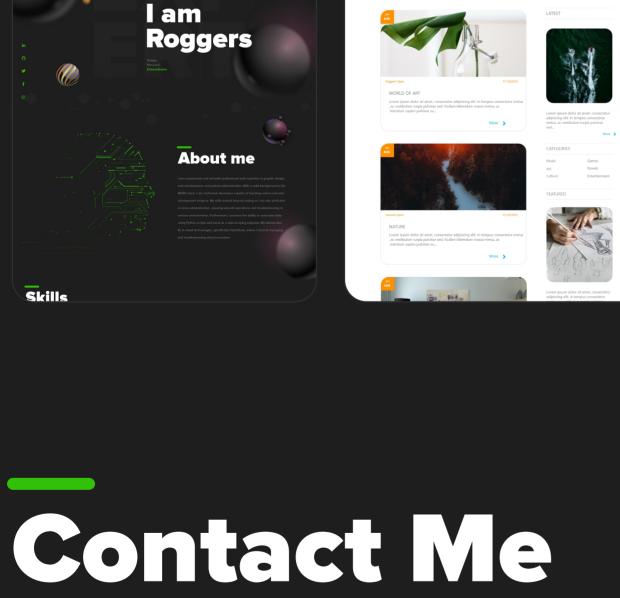

Cloud Technologies: My expertise in cloud technologies, specifically OpenStack, allows me to harness the power

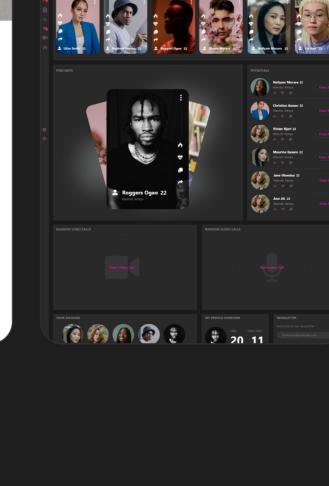

of virtualization. I possess a deep understanding of managing and troubleshooting virtual machines, ensuring efficient resource allocation and optimal performance. With my knowledge of cloud architectures, I can help organizations leverage the benefits of scalability, reliability, and cost-efficiency offered by cloud platforms.
